

HUMAN ANATOMY

Skeletal system

1. Is the articular capsule part of the elbow or the knee?
a) elbow b) knee c) both
2. How many ribs does a normal person have?
a) 12 b) 15 **c) 20**
3. How many premolar teeth do we have?
a) 4 b) 2 **c) 8**

Lymphatic system

4. the spleen structure is similar to:
a) a large lymph node b) a small lymph node
5. the thymus is largest and most active during:
a) childhood **b) neonatal and pre-adolescent** c) adolescent

Muscular system

6. Choose the muscle which are not in the back:
a) Latissimus dorsi b) Serratus anterior c) Infraspinatus
7. What muscles make up the quadriceps?

a) **rectus femoris, vastus lateralis, vastus medialis, and vastus intermedius.**

b) biceps femoris, rectus femoris, semitendinosus, adductor magnus

8. How many gluteal muscles do we have?

a) 2

b) 5

c) 6

Respiratory system

9. What are the functions of the lungs?

a) extract oxygen from the atmosphere and transfer into the brain

b) extract oxygen from the atmosphere and transfer into the heart

c) extract oxygen from the atmosphere and transfer into the bloodstream

10. What is the colloquial name of the trachea?

a) pipe cartilages

b) respiratory tube

c) windpipe

11. Which lung is bigger?

a) Right

b) Left

12. How much do both lungs weigh together?

a) 1,5 kilograms

b) 1 kilograms

c) 1.3 kilograms

Eye

13. What is the function of the optic nerve?

a) Transmits light from the sun to the heart

b) Transmits visual information from the retina to the brain

c) Its task is create tears to lubricate the eyes

Circulatory system

14. is the anterior interventricular vein or artery?

- a) artery **b) vein** c) none

Digestive System

15. How long is the human rectum?

- a) 20 cm
b) 12 cm
c) 15 cm
